reminders

Better
patient care

Reduced admin
cost & time

Sending SMS via Manage My Health gives you a fast, reliable, and cost-efficient way to connect with your patients

Improve patient communication

SMS communication increases the likelihood of reaching patients and gives them a simple and convenient way to reply, improving response rates.

Better patient care

Easier connection with patients when needing to send health-related updates can improve the patient's experience, engagement with the practice, and overall satisfaction.

Simple & configurable

Choose when and who to send sms notifications for appointments or other communications to increase response.

Reduce admin cost & time

Reduce mails, phone calls and manual communication to reduce the practice's operational costs and increase their efficiencies.

Appointment reminders

Missed appointments are costly for practices and disrupts patient care. Reduce missed appointments and ensure continuity of care by sending SMS reminders.

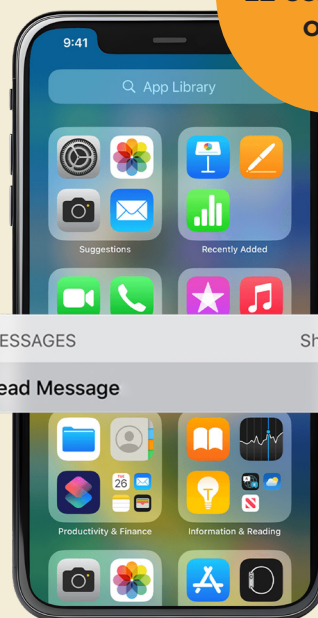

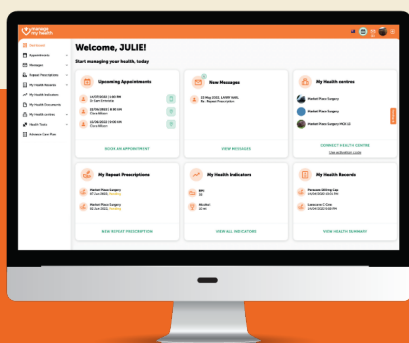

Control costs

Simple credit facility engine allows practices to ensure only a fixed amount to spend on SMS to easily manage costs.

Reach everyone, Smartphone or not

Connect with everyone! Even those who don't have smartphones. With Manage My Health, you'll never miss a beat in reaching out to your patients. Because, after all, connecting with patients is key!
